

论文信息

Figure 4. Overview of STAtten architecture. (a) Block-wise temporal attention mechanism. Binary Q , K , V tensors are partitioned into temporal blocks, where black lines indicate paired timestep processing. (b) Computation flow with tensor dimensions, where T is the number of timesteps, N is the number of tokens, B is block size, and D is the feature dimension.

论文题目: Spiking Transformer with Spatial-Temporal Attention

中文题目: 具有时空注意的脉冲 Transformer

论文链接: <https://arxiv.org/pdf/2409.19764>

官方 github: <https://github.com/Intelligent-Computing-Lab-Yale/STAtten>

所属机构: 耶鲁大学电气工程系

核心速览: 本文介绍了一种名为 Spiking Transformer with Spatial-Temporal Attention (STAtten) 的新型架构，该架构通过在自注意力机制中整合空间和时间信息，提高了基于脉冲的 Transformer 模型的性能。
