

核心速览

论文题目： SCNet: Lightweight Spatial–Channel Attention Network for Remote Sensing Change Captioning

中文题目： SCNet: 面向遥感变化标注的轻量级空间-通道注意力网络

论文链接：

<https://ieeexplore.ieee.org/abstract/document/11397416>

所属单位： 西安交通大学等

核心速览：

本文提出 SCNet，一种轻量级空间-通道注意力网络，用于遥感图像变化描述。

```
SpatialAttentionModule(
  (q_proj): Linear(in_features=64, out_features=64, bias=True)
  (k_proj): Linear(in_features=64, out_features=64, bias=True)
  (v_proj): Linear(in_features=64, out_features=64, bias=True)
  (out_proj): Linear(in_features=64, out_features=64, bias=True)
)
ChannelAttentionModule(
  (qkv_proj): Linear(in_features=64, out_features=192, bias=True)
  (dwconv): Sequential(
    (0): Conv2d(64, 64, kernel_size=(3, 3), stride=(1, 1), padding=(1, 1), groups=64)
    (1): BatchNorm2d(64, eps=1e-05, momentum=0.1, affine=True, track_running_stats=True)
    (2): GELU(approximate='none')
  )
  (out_proj): Linear(in_features=64, out_features=64, bias=True)
)
Input shape      : torch.Size([2, 64, 32, 32])
SAM output shape: torch.Size([2, 64, 32, 32])
CAM output shape: torch.Size([2, 64, 32, 32])
```
